

# BUILT-IN BIOETHANOL FIREBOX FIREPLACE INSTALLATION INSTRUCTIONS

Item Number: BIO-30-002, BIO-30-004

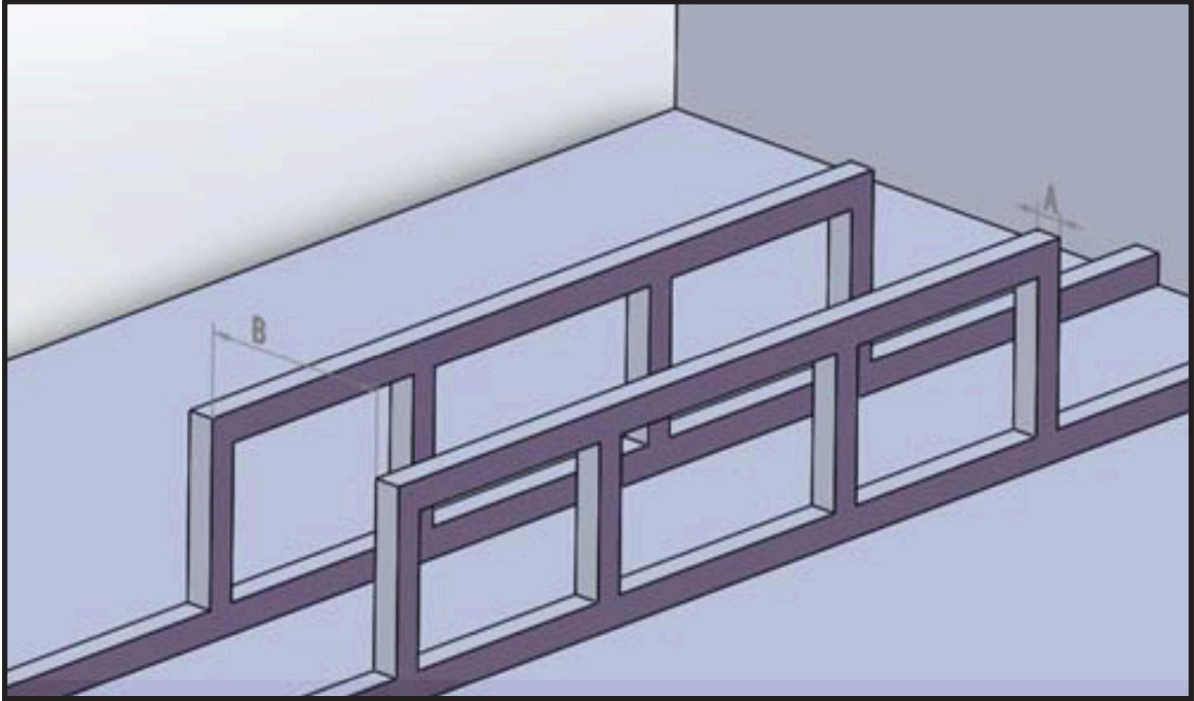

Dimensions of the bioethanol fireplace may vary 2% (plus or minus) due to material attributes.  
Therefore Bio Fireplace Group recommends using the actual fireplace when making the final cut out.

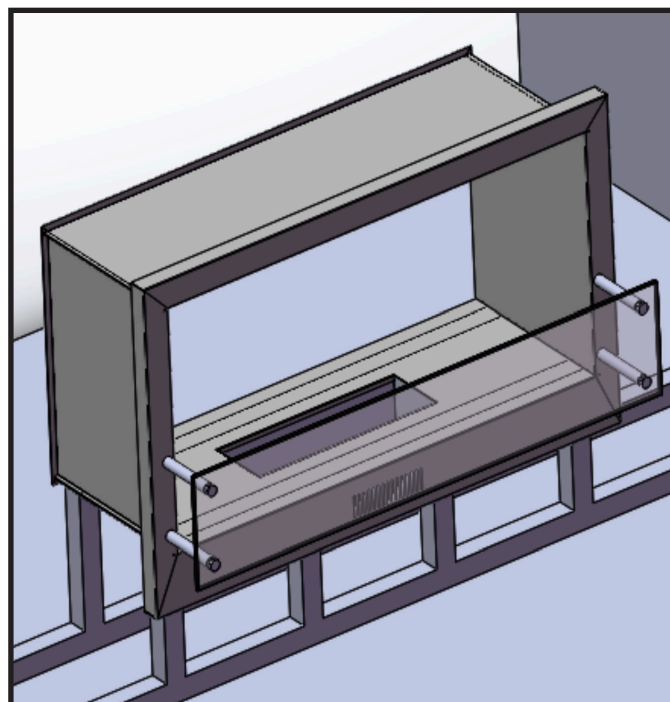

# Installation Instructions

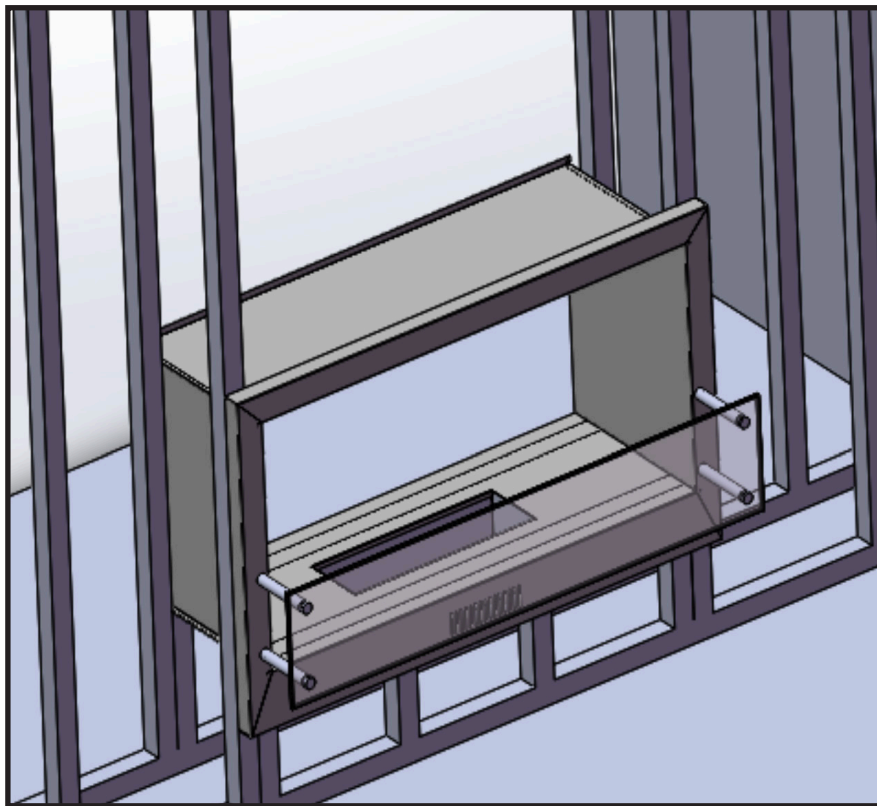

1. Build a base for the firebox to sit on.
2. Base may be built of any materials.
3. Make sure the base is level on all sides.

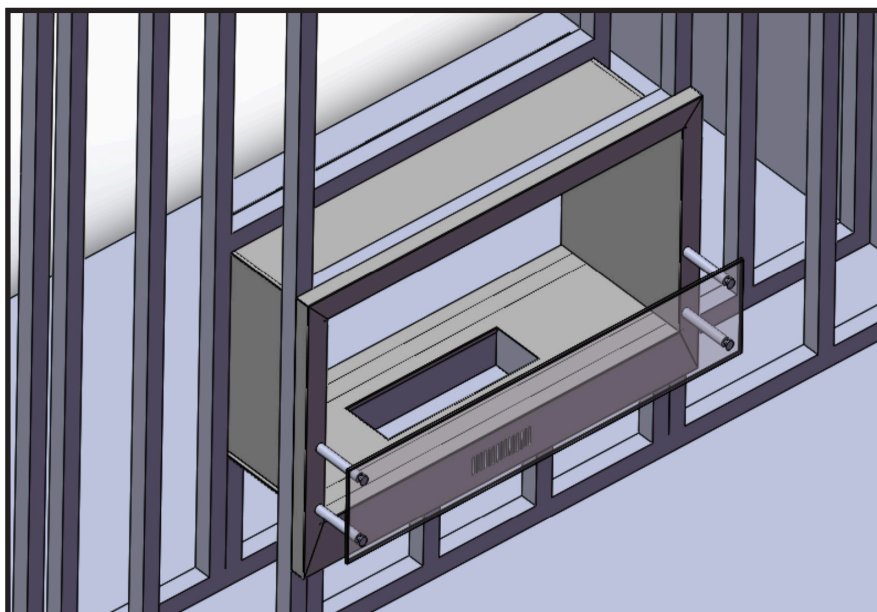

4. Insert your built-in bioethanol fireplace into the base.
5. Make sure the fireplace is centered.

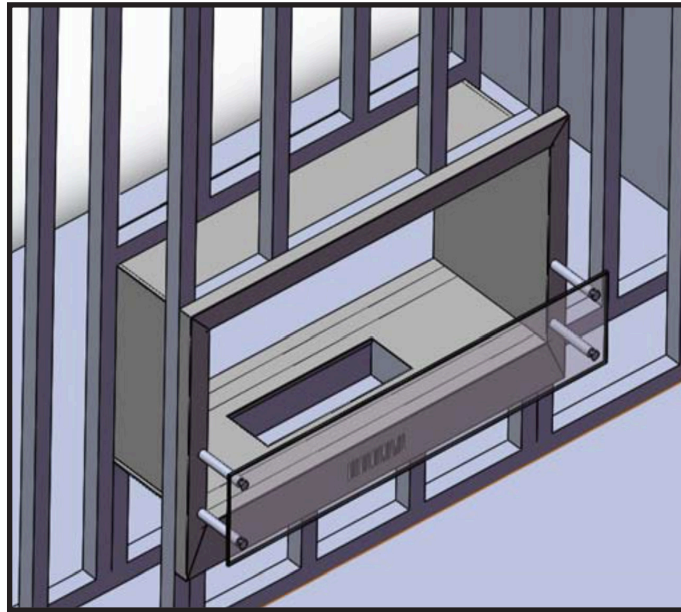

6. Continue building the wall.
7. First stud on either side of the firebox must be flush with the firebox and flange.

8. Install a stud horizontally on top of the firebox to be able to continue with the wall.

9. Continue building the wall.
10. Support the firebox with screws around the flange into the studs.

11. Cover the firebox with sheetrock, wonderboard, stone, etc.
12. Mount the glass to the firebox.
